

Why should I sign up for Clean Energy?

When you sign up for clean energy, the lights will still go on and all of your appliances will work just the same as they always have. The only difference is that you will be helping to create cleaner air, a healthier community and energy independence.

Act now and there's a Special Bonus: when 7% of our community signs up for clean energy with one of the Pennsylvania clean energy suppliers (see inside), Wrightstown Township will receive a **free** 1kW solar energy system as a symbol of the township's leadership! Sign up your home or business for clean energy today!

For more information or to sign up online, visit:
