

AN EXELON COMPANY

PECO ELECTRIC UPGRADE PROJECT
Upper Makefield, Wrightstown, Solebury,
and Buckingham Townships

Project Work Begins

We are contacting you about an upcoming project occurring in Upper Makefield, Wrightstown, Solebury, and Buckingham Townships that will enhance the local electric distribution system. The project is part of a \$45 million infrastructure investment in our region to better withstand more frequent and damaging storms, improve reliability by reducing the frequency of outages that cannot be prevented, and support the adoption of cleaner energy resources such as solar and electric vehicles.

See more on back.

Work Schedule and Details

As part of this project, we anticipate that tree removals and tree trimming work will be required. During the next few weeks, qualified PECO contractor Davey Resource Group (DRG) will be in your area surveying the tree work to determine the impact. If there is required tree work on your property, we will contact you directly to review in-person. Vegetation work, which includes potential tree trimming and removals based on DRG's assessments, will begin as early as November in portions of Buckingham, Solebury and Upper Makefield Townships. We have developed a plan to minimize direct customer impact as much as possible and to complete the project in a safe and timely manner.

Stay Informed

If you have any questions regarding the details of this project, please contact **Gary.Dollahon@exeloncorp.com**.
